

Dermatopathology
Differential Diagnosis
Clear Cells in the Epidermis

Paul K. Shitabata, M.D.
Dermatopathology Institute

Must Know Diseases

Disease	Differentiating Traits
Bowen's disease	Disorganized windblown with variable atypia, may localize to upper 1/3 of epidermis
Paget's disease	Vacuolated cells are not empty, may contain wispy mucin
Melanoma	Vacuolated cells throughout the epidermis

Rarer Diseases
