**Leukocytoclastic vasculitis is commonly present in all except:**

- A. Henoch-Schonlein purpura
- B. Microscopic polyangiitis
- C. Urticarial vasculitis
- D. Sweet's syndrome
- E. Erythema elevatum diutinum

# Answer D

- Sweet's syndrome

# Matching

Microscopic polyangiitis	Probable Arthus reaction
Granuloma faciale	Treat with IgG
Wegener's granulomatosis	p-ANCA
Kawasaki's syndrome	c-ANCA

# Answers

# Classic neutrophilic dermatoses include all except:

- A. Bowel-associated dermatosis-arthritis syndrome
- B. Toxic erythema
- C. Behcet's syndrome
- D. Acute generalized pustulosis
- E. Familial Mediterranean fever

# Answer B

- Toxic erythema

Characteristic associations with Behcet's syndrome  
include all except:

- A. Decreased serum IL-8
- B. Pathergy
- C. Erythema nodosum-like lesions
- D. Lymphocytotoxicity to oral epithelial cells
- E. Meningoencephalitis

# Answer A

- Serum IL-8 is elevated and a reliable marker of disease activity

# Lymphocytic vasculitis has been associated with all except:

- Leukemia cutis
- Behcet's syndrome
- Granuloma faciale
- Gyrate erythema
- PUPPP

# Answer C

Granuloma faciale

Diseases with infiltrates filling the papillary dermis

LUMP=?

# LUMP

L=lichenoid disease

U=urticaria pigmentosa

M=mycosis fungoides

P=pigmented purpuric dermatosis

# Match the following:

Disease	Trait
Lymphomatoid granulomatosis	Peripheral neuropathy may be present
Wegener's granulomatosis	Considered a variant of Mondor's phlebitis
Allergic granulomatosis	T-cell rich B-cell lymphoma
Sclerosing lymphangitis of the penis	Circulating Ab to Proteinase 3
