

## Colloidal Iron

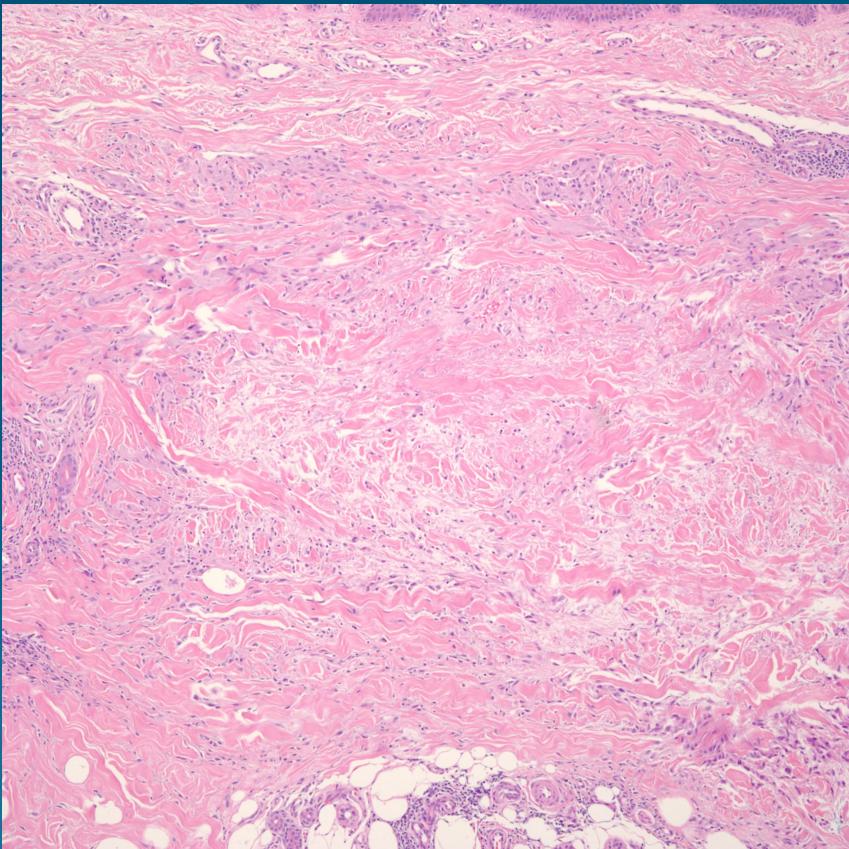

# What is the best diagnosis?

- A. Scleromyxedema
- B. Scleredema
- C. Scleroderma
- D. Granuloma annulare
- E. Necrobiosis lipoidica

# Granuloma Annulare

# Pearls

- Dermal necrobiosis with mucinous degeneration rimmed with histiocytes, giant cells, and lymphocytes
- May confirm mucin with colloidal iron or Alcian blue/PAS
- Plasma cells rare
- Usually expansile nodule that may extend into deep reticular dermis
- DDX: Necrobiosis lipoidica
