

What is the best diagnosis?

- A. Hailey-Hailey Disease
- B. Pemphigus vulgaris
- C. Pemphigus foliaceus
- D. Darier's disease
- E. Pemphigus vegetans

Pemphigus foliaceus

Pearls

- Intracorneal bulla with acantholysis
- Occasional acantholytic cells cling to the undersurface of the stratum corneum
“Klingons”
- Variable inflammation but usually eosinophils predominate
